folding . sliding . doors  
aluminium bi-fold and sliding doors made in the UK

# SF VIEW

## PRODUCT SPECIFICATION

BI-FOLDS | SLIDING DOORS | WINDOWS

### LET THERE BE LIGHT

The SFVIEW is the most superior quality bi-folding door system manufactured in the UK. Despite narrow face width the frames are incredibly strong, meaning that the individual door panels can go up to an extremely impressive 1200mm wide and 3000mm high. Other features include attractive profile design with radiused edges and EPDM glazing gaskets with discreet gasket lips preventing black borders around the glazing. The door leaf-stack folds easily with minimal force, inward or outward, and slides to the right and/or to the left, gliding almost silently on high-quality roller carriers securely guided at the top and at the bottom.

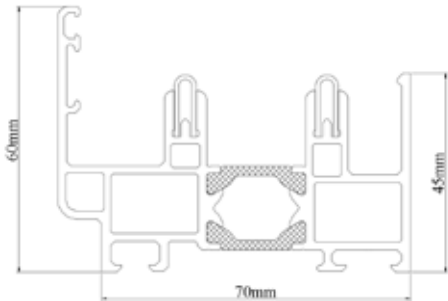

(Detailed product diagrams overleaf)

# PRODUCT OVERVIEW: SFVIEW Bi-folding door

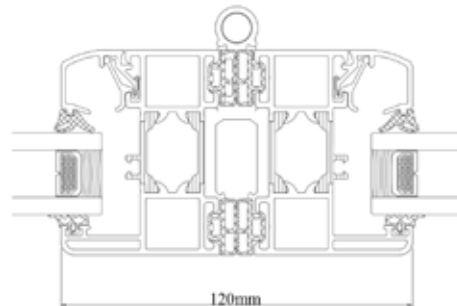

- Frame depth of 70mm
- Typical sightline of just 120mm
- Suitable for commercial/heavy usage applications
- Suitable for large expanses well in excess of 10m
